UTILITY BILL AUDITING

Significant monthly cost reductions and refunds

Contact us at 833.469.7283 to discuss how you might be eligible for refunds and reductions on your services.

WHAT IS A UTILITY BILL AUDIT?

A utility bill audit is the review of an organization's utility and service invoices to identify billing errors, refund opportunities and cost reduction potential for future savings. This is separate from a physical audit which seeks to minimize spending through an investment in improved efficiency.

WHAT BUSINESSES SHOULD KNOW:

Errors are common. Unbeknownst to many organizations, a **vast majority of service billing statements contain errors.** Over the course of months and years, these minor billing errors can add up to substantial sums, costing an organization thousands of dollars.

CONSOLIDATED SOLUTIONS PROVIDER "FOUNDED ON PURPOSE"

Did you know that a single line entry can be representative of several individual charges that can be neither accurate nor applicable when it comes to your business? This simple truth, with the capacity to cost companies hundreds of millions of dollars, remains the motivation behind our purpose and the reason TruPowur was founded.

TruPowur, Inc. is a consolidated solutions provider. Although we specialize in identifying and correcting utility and service contract billing errors, we also serve as a complete resource for our clients – bringing industry leading systems and technology to address their needs.

Our simple, no upfront cost utility bill audit process provides for a guaranteed, no risk solution to lower your businesses operating expenses and increase your bottom line. We have a highly successful track record of reducing monthly costs and obtaining substantial refunds from providers of electricity, gas, waste removal, telecommunications, shipping, merchant processing, water/sewer and even workers' compensation insurance nationwide.

STEP 1: INITIAL AUDIT

Provide an initial data set - just 1-3 recent invoices and a copy of any existing agreement for service - and we will determine if there is potential for cost reductions and/or refunds.

STEP 2: DETAILED AUDIT

We obtain a service Agreement and Letter of Agency allowing us to work directly through your provider and determine the depth and amount of over billing.

STEP 3: CORRECT ERRORS

With your approval, we implement proposed cost reductions, and pursue refunds for any related over billing where we are able to.

STEP 4: CONFIRM SAVINGS

If savings and refunds are realized, we share them with you. We are only compensated after confirmed results for our services.
