WHAT IS A MERCHANT PROCESSING AUDIT?

Merchant Processing Audits from Util provide an itemized review of all credit and debit card transactions accepted by your company monthly. Without changing your current processor, Util is able to identify where adjustments can be made and how you were billed for each transaction and cost savings are created.

WHY COMPANIES NEED MERCHANT PROCESSING AUDITS:

Merchant processing charges are among the most complicated billing statements that your business will receive. Switching processors can damage your banking relationship, or worse, can interrupt cash flow to your business. Util Auditors merchant processing audits lower costs without changing your processing bank or equipment.
