WHY YOUR COMPANY NEEDS A
A TELECOMMUNICATIONS & WIRELESS AUDIT

TruPowur™
UTILITY COST RECOVERY AUDITORS

BBB ACCREDITED BUSINESS

SIGNIFICANT MONTHLY COST REDUCTIONS AND REFUNDS

WHAT IS A TELECOMMUNICATIONS AND WIRELESS AUDIT?

Telecommunications Audits include a review of an organization's phone (local and long distance) and Internet and TV (cable and dish) invoices for inefficiencies in plan structure and possible over billing. Similarly, a Wireless Audit reviews mobile talk, text and data invoices in the same manner. Through consolidation and elimination of excess services, Util is able to create significant cost reductions.

WHY COMPANIES NEED TELECOMMUNICATION AND WIRELESS AUDITING:

Most large Telecom and Wireless customers mistakenly believe their current plan provides substantial price breaks for usage, however, typically, they are still paying discounted retail. Util provides access to wholesale pricing that even the largest accounts cannot obtain directly. Technology and service options change daily and analyzing that frequently is too time consuming to justify the results. Util will assure that you are optimized by implementing initial cost reductions, and then monitoring ongoing usage to assure projected savings are realized. Additionally, as we monitor your accounts we look for opportunity to reduce costs further, assuring you are on the most efficient billing structure.

ANTICIPATED TIMELINES & REQUIRED DOCUMENTATION

Initial Audit - (2 weeks)
- ☐ 3 months of recent invoices per service (all locations)
- ☐ Copy of any existing contracts in place

Detailed Audit - (2 weeks)
- ☐ Util Authorization - provides access to required account data
- ☐ Util Agreement - contingent upon realized savings and refunds

Implementation
- Approve and execute cost reductions adjustments
- Cost savings and refunds realized in 1-2 billing cycles
