WHAT IS A WORKERS' COMPENSATION AUDIT?

A Workers' Compensation Audit by Util Auditors is an independent review of the premiums, classification codes and experience modifiers assigned to your policy by your provider.

WHY COMPANIES NEED WORKERS' COMPENSATION AUDITS:

Your insurance providers will review your Workers' Compensation policy annually to assure they are charging you enough to cover their exposure. Often times this results in premium increases designed to protect their interests. An independent review can identify unjust increases in premium by contesting the adjustments made through your provider. We are often able to reduce current policy costs and obtain historical refunds going back as far as 7 years.
