

# WHY YOUR COMPANY NEEDS AN **ENERGY BILL AUDIT**

SIGNIFICANT MONTHLY COST REDUCTIONS AND REFUNDS

## WHAT IS AN ENERGY BILL AUDIT?

An Energy Bill Audit is a review of the rate, tax and tariff structure that you are billed by your provider and supplier. Util identifies errors in these charges, which are then corrected, saving you monthly. We then work through your provider to obtain a refund for related over billing going back as far as you are legally entitled to.

## WHY COMPANIES NEED ENERGY BILL AUDITING:

The tariff structures that energy providers use to structure billing are complex and make it difficult to know if you are being charged correctly. It's estimated that some 80% of utility and service billing statements contain errors. Over months and years these minor billing errors can add up to substantial sums costing your organization thousands of dollars.

## ANTICIPATED TIMELINES & REQUIRED DOCUMENTATION

### Initial Audit - (1 week)

To be provided per service (electricity, natural gas, etc.)

- 1 recent month provider invoice per location
- 1 recent month supplier invoice per location (deregulated markets)
- Copy of any existing supply contract (deregulated markets)

### Detailed Audit - (2 - 4 weeks)

- Util Authorization - provides access to required account data
- Util Agreement - contingent based on realized savings and refunds

### Implementation

- Savings from cost reductions realized in 1-2 billing cycles
- Refunds received in 1 to 6 months (location dependent)
