RE: Util Auditors, LLC

Dear Prospective Client,

Lambro Industries, Inc. provides venting solutions for residential and commercial customers. Based in Amityville, New York with a 50,000 sq. ft. facility, Lambro offers venting and duct products, such as laminated, semi-rigid, vinyl and insulated ducts; accessories, rigid ductwork, and rigid elbows and pipes; and wall, roof and eave vents for HVAC components, dryer, kitchen and bathroom venting.

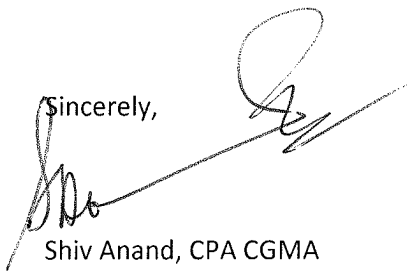

Our company engaged Util Auditors in May 2017 to review our Energy, Shipping, and Workers Compensation cost centers.

Util Auditors were able to complete all the audits simultaneously with limited involvement on our end. The energy audit resulted in a refund of more than \$16K, and monthly future cost reductions on our electricity account. Lambro is also receiving ongoing credits and refunds for shipments due to Util's Shipping audit.

As the President of Lambro Industries, I was very impressed with Util Auditor's broad industry knowledge and expertise in recovering funds and reducing our costs going forward.

Overall, we were extremely pleased with the professionalism and prompt work completed by Util Auditors and would highly recommend them to anyone interested in these types of services.

Sincerely,

Shiv Anand, CPA CGMA  
President
