

Re: Utility and Service Invoice Auditing via Util Auditors, LLC

Prospective Audit Clients:

Premier Meats retained Util Auditors to review our utility invoices, beginning with energy and water/sewer.

While we were not presently being overbilled for our water/sewer, they did identify a more beneficial tariff option for one of our largest facilities savings us in excess of 5 figures annually.

Following, they reviewed our merchant processing statements and implemented improvements there saving us 20% on the fees that we pay just to accept credit cards.

The process was simple, requiring very little paperwork from us. Everything was done with no requirement for an on-site visit, or disruption to our business.

We will be sending our workers' compensation data next – so I can confidently say that I would recommend the services of their firm.

Best Regards,

A handwritten signature in blue ink that reads "LeeAnn M. Candelaria".
